

PowerSchool Communication Tools: Class Rosters

PowerSchool Communication Tools: Class Rosters

Use the Class Rosters (PDF) report to create class rosters or roll sheets for some or all of the teachers in your school.

To access the Class Rosters (PDF) report, navigate through the following pages in PowerSchool:

Start Page > System Reports > Class Rosters (PDF)

Follow the instructions below to print class rosters for two teachers. Each roster will include all of a teacher's classes and emergency contact information for each student.

Class Rosters (PDF)

The screenshot shows the configuration interface for the Class Rosters (PDF) report. It includes a list of teachers to select, a table for selecting meetings, options for including students, and formatting options for the report heading.

Print rosters for
(hold the COMMAND key to make multiple selections)

- Abram, Michael
- Accatino, Steve
- Adams, Mark B
- Bean, Ben
- Berndt, Gordie E
- Bowe, Sheldon K

Meeting(s) (leave unchecked for all)

	A	B
1	<input type="checkbox"/>	<input type="checkbox"/>
2	<input type="checkbox"/>	<input type="checkbox"/>
3	<input type="checkbox"/>	<input type="checkbox"/>
4	<input type="checkbox"/>	<input type="checkbox"/>

Include students who

- are currently enrolled in class
- were enrolled on (MM/DD/YYYY)
- were enrolled any time between (MM/DD/YYYY) and (MM/DD/YYYY)

Heading font: Times

Size, line height, style: 10 12 (points) Bold Italic Underline

Print heading on: All pages

To select two of the teachers, click the first teacher's name, then hold the Control key (PC) or Command key (Mac) and click the second teacher's name.

Clear the Meetings check boxes to include all classes and all periods.

Next, select **are currently enrolled in class** to include all of the actively-enrolled students in the report. To include only students enrolled by specific dates, select "were enrolled on" and enter a date or select "were enrolled any time between" and enter dates.

Change the heading format if the default information doesn't fit your needs. You have options to change the font type, font size, line height, and style.

For the "Print heading on" menu use the default selection **First page of each class** since you are printing reports for multiple teachers and multiple classes.

The next section covers the document's heading text.

The screenshot shows the heading text configuration interface. It includes a text area for entering the heading text and a list of fields that can be used in the text.

Heading text (Fields)
Enter ^(teachername) to cause the teacher name to appear, and ^(class_expression) for the expression

Teacher: ^(teachername)
Course: ^(course_number)
Period: ^(class_expression)
Room: ^(room)
Number of Students Enrolled: ^(no_of_students)

PowerSchool Communication Tools: Class Rosters

In the heading, you can enter two types of text. One type is static text, like the word "Teacher" in the example above, which will print as written. The other type is code, called a field, that tells PowerSchool to get information from the database and insert it in the heading. For example, the code `^(teachername)` tells PowerSchool to get the teacher's name from the database and insert it in the heading. Make sure to use the carat (^) when entering codes.

To set up a basic class roster heading, enter the following information in the "Heading text" box:

```
Teacher: ^(teachername)
Course: ^(coursename)
Period: ^(expression)
Room: ^(room)
Number of Students Enrolled: ^(no_of_students)
```

Here is an example of what a printed class roster heading looks like:

```
Teacher: Abram, Michael
Course: U.S. History
Meeting: 1(A)
Room: 125
Number of Students Enrolled: 19
```

PowerSchool Data Access Tags: Class Rosters (PDF) Heading

Here are some other codes you can use in the heading:

Code	Does This	Example Result
<code>^(teachername)</code>	Displays the teacher's name	Barker, Richard
<code>^(expression)</code>	Displays the period(day) combination of the section	3(B)
<code>^(coursename)</code>	Displays the name of the course	Algebra 1
<code>^(no_of_students)</code>	Displays the number of students currently enrolled in the section	27
<code>^(maxenrollment)</code>	Displays the maximum number of students who can be enrolled in the section	35

PowerSchool Communication Tools: Class Rosters

^(room)	Displays the room number where the section meets	210
---------	--	-----

Next, complete the column style fields on the Class Rosters page.

Column title font	Helvetica
Size, line height, style	12 (points) <input checked="" type="checkbox"/> Bold <input type="checkbox"/> Italic <input type="checkbox"/> Underline
Print column titles on	All pages
Roster Font	Times
Size, line height, style	10 12 (points) <input type="checkbox"/> Bold <input type="checkbox"/> Italic <input type="checkbox"/> Underline

Change the column format if the default information doesn't fit your needs. For example, you can change the column title font, font size, line height, and style.

In the "Print column titles on" menu, use the default selection **All pages** to include all of the information on each page.

Define the roster style settings or use the default settings.

Next set up the roster columns. Each line of information you enter in this text area defines the columns that will be printed on the roster. What you enter in the Roster columns field requires special attention because the information you enter is always in the same format.

Roster columns (Fields)	Format: field name \ column title \ column width \ alignment last_name\Last Name\1.75\L first_name\First Name\1.25\L home_phone\Student Phone #\1\C
--------------------------------	--

In the Roster columns text box, the code format is always the same. Type items in this order with a backslash (\) between the segments:

- 1.The field name to pull information from or a data access tag
- 2.The column title as it will appear on the roster
- 3.The column width in inches
- 4.The alignment of text in the cell—L for left, C for center, and R for right.

Make sure to use a backslash (\) instead of a slash between the segments. This is the only place in PowerSchool where you use the backslash.

PowerSchool Communication Tools: Class Rosters

After typing the first column entry in the Roster columns text box, press **Enter** and type in the next column entry, and so on.

For example, to format a class roster that includes the student's last name, first name, and home phone number enter:

```
last_name\Last name\1.75\L  
first_name\First name\1.25\L  
home_phone\Student phone#\1\C
```

The Roster columns text box is linked directly to the Students table. If you enter a student field name, PowerSchool pulls the information from the Students table, so you do not need to use a data access tag. If you are not sure which fields from the Students table to use, click **Fields** to find the information.

Be sure to take some time and plan out the columns you want to ensure the information does not run off the page.

PowerSchool Data Access Tags: Class Rosters (PDF) Roster Columns

Here are some other codes you can use in the Roster Columns text area:

Code	Does This	Example Result
^(pg.final.grade;Q1)	Displays the student's current Q1 final grade	A-
^(pg.final.percent;Q1)	Displays the student's current Q1 final percent	93
^(pg.final.citizenship;Q1)	Displays the student's current Q1 citizenship mark	U
^(teachercomment)	Displays the current teacher comment	Progressing well in class.
^(historical;Q1;grade)	Displays the student's stored Q1 final grade	B+
^(historical;Q1;percent)	Displays the student's stored Q1 final percent	89
^(historical;Q1;citizenship)	Displays the student's stored Q1 final citizenship mark	S
^(historical;Q1;earnedcrhrs)	Displays the number of credits that were stored for the student in Q1	0.5
^(historical;Q1;comment)	Displays the stored Q1 teacher comment	Has appropriate work habits.

PowerSchool Communication Tools: Class Rosters

Code	Does This	Example Result
^(historical;Q1;datestored)	Displays the date that the Q1 grade was stored	11/05/2012
^(att;abs;Q1)	Displays the total number of absences for Q1	7
^(att;tar;Q1)	Displays the total number of tardies for Q1	2
^(att;X;Q1)	Displays the total number of occurrences of the specified attendance code for Q1	3
^(att;S;10/1/2012;10/31/2012)	Displays the total number of occurrences of the specified attendance code for the date range	1
^(attpoints)	Displays the total number of attendance points the student accumulated in the teacher's class	10
^(attpoints;Q1)	Displays the total number of attendance points the student accumulated in the teacher's class during Q1	7

Next, set up the page parameters on the bottom of the Class Rosters (PDF) page.

Rule width (points)	Horizontal <input type="text" value="1"/> Vertical <input type="text" value="1"/>
Cell padding (points)	Horizontal <input type="text" value="2"/> Vertical <input type="text" value="2"/>
Page size	Letter (8 1/2" x 11") Custom size: Height <input type="text"/> Width <input type="text"/>
Margins (inches)	Left <input type="text" value=".5"/> Top <input type="text" value=".5"/> Right <input type="text" value=".5"/> Bottom <input type="text" value=".5"/>
Orientation, Scale	Portrait (vertical) 100
Watermark text	<input type="text"/>
Watermark mode	Overlay
When to print	ASAP <input type="text"/> (MM/DD/YYYY) / <input type="text"/>
Report Output Locale	English

Submit

To make grid lines print on the report, set the horizontal and vertical rule widths to 1 point each.

PowerSchool Communication Tools: Class Rosters

Make your roster easier to read by leaving white space around the text within each cell. Set the horizontal and vertical cell padding to 2 points each.

To print the report on standard 8 1/2" x 11" paper, choose **Letter** from the Page size menu. Best practice is to set all of the margins to .5 inches, or adjust as needed.

Use the Orientation menu to change the page layout to landscape or portrait. If your report includes many columns and you need more space, you can choose **Landscape** to gain an extra 2.5 inches on the page.

Leave the Scale field blank, set it to 100 to make the report print in full-scale, or adjust the scale to a different value as needed.

A watermark can be added to the page. In most cases, a watermark is not necessary on rosters.

Define when the document will print. If you want to print the roster immediately, choose **ASAP** from the "When to print menu."

Finally, click **Submit** to run the report.

PowerSchool Communication Tools: Class Rosters

Sample Class Roster

Teacher: Abram, Michael

Course: U.S. History

Meeting: 1(A)

Room: 125

Number of Students Enrolled: 19

Last name	First name	Student phone#
Bailey	Jenilyn	916-555-1511
Brito	Jordan	916-555-1302
