How To

Import Export Template

NOTE: It is possible to have multiple Export/Import templates with the same name. For this reason, it is recommended that existing templates with the same name as those being imported be removed or renamed.

- From the start page click on **System** under **Setup**.
- Select **Import Report Template**.
- Set the Character Set, browse to and select the downloaded template file and click **Import**.

Export Using Export Template

- With the records to export data for selected, choose **Export Using Template** from the function menu. Alternately, you can directly navigate to the Export Using Template page after selecting the records: **Special Functions->Importing & Exporting->Export using Template**.
- Choose the appropriate type of export from the Type of Export drop-down and Submit. The templates broken down into the type of export values: Students, Courses, Student Schedules, Teachers and Historical Grades.
- Select the Export template from the drop-down menu and Submit.
